

VIGIFLAM VQ

VIGIFLAM VQ

The VIGIFLAM VQ, a flameless device linked to a VIGILEX panel, offers indoor and outdoor versatility. It provides a cost-effective alternative to pipe installations, preventing flame and particle spread. During an explosion, the VQ's vent opens, containing dust while venting gases safely.

VIGIFLAM VQ R

The VIGIFLAM VQ R is a curved rectangular flameless device connected to a standard bursting panel VIGILEX VL R. Designed to be installed directly on cylindrical vessels, it eliminates the risk of material accumulation in front of the explosion panel.

VIGIFLAM VQ SST

The VIGIFLAM VQ SST, a rectangular flameless device, is linked to a standard VIGILEX bursting panel. Ideal for food or pharmaceutical facilities or environments with high humidity, it offers effective low-pressure resistance, preventing flame and glowing particle spread.

VIGILEX VQ			Nominal panel Size				Nominal panel area				Weight				Fixing Bolt Nbr			
VIGIL'Ex VQ 170×470			170×470 mm / 7×19 inch				0,0785 m ² / 0,845 sq ft				62 kg				20 M10×30
